ASIA 2016

Asia's most established oil & gas trade event

With continued unwavering support from the industry, OSEA2016 concluded on yet another positive note, reinforcing its position as the most established oil & gas trade event in Asia.

17,975 trade attendees from across the globe attended the 4-day exhibition and conference. Besides forging and renewing business contacts, leads and connections, attendees kept abreast of the latest innovative solutions and opportunities, as well as gained insights on tackling challenges put forth by the volatile global market.

17,975
Trade Attendees

The Asia Pacific is a very important market for us, and OSEA, being held in Singapore, where many rig owners have a foothold and many shipyards are located, makes it a vital hub for us. We have made good contacts at the show, and am confident 2017 will see new opportunities for us to add value to our clients and help them distinguish their operations from the rest of the market.

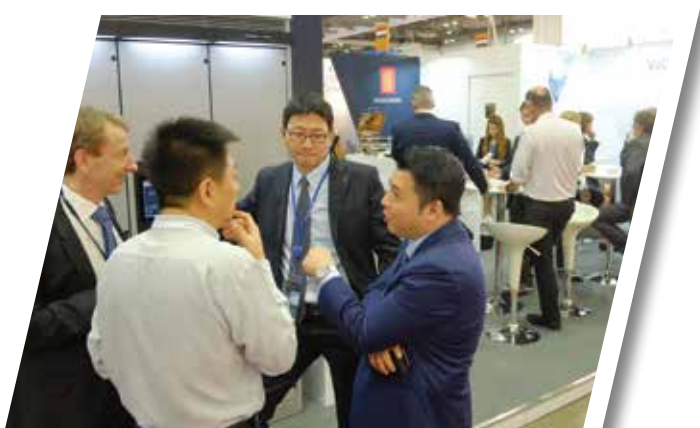

Mattijs Faber
Marketing Manager, GustoMSC

World-class platform chosen by global oil & gas solution providers

An impressive line-up of 17 international group pavilions from Australia, China, France, Germany, Italy, Korea (3), Netherlands (2), Norway, Russia, Scotland, Singapore, Taiwan, UK and USA drew crowds who were eager to find out more about their strengths and offerings.

983 exhibitors
from 48 countries /
regions

For the past few days, many relevant visitors had visited the Norwegian Pavilion and participated in business meetings, networking, stand presentations, and product demonstrations that have provided good leads, potential contracts and partnership opportunities. Given the low energy prices and low profitability levels, there has been a strong cost focus to use advanced and cost effective technologies. OSEA2016 has been successful to provide additional insights, trends and generated many opportunities for our exhibitors to collaborate with local players.

Torunn Aass Taralrud
Director, Innovation Norway Singapore

OSEA has been an enriching and eye-opening experience. Being in the maintenance and operating services sector, OSEA has been an excellent platform for me to compare similar or identical products from various companies.”

Patricio R. Lopez
P2 Energy & Power International Services Corporation, Philippines

I’m glad to have visited OSEA2016 as it has been a fruitful trip. I met new suppliers from Italy and UK who can provide useful solutions for the fast-growing oil & gas, marine and shipbuilding industries in India.

Kiran Laliwala
Managing Director, Heliflex Engineering & Services, India

Refreshed conference and delivery with delegates in mind

Presented in an all-new more intimate format, the **OSEA2016 International Conference** offered an interactive learning experience through 13 masterclasses that focused on Asset Optimisation, Operational Excellence and Sustainable Growth.

The content of the masterclass conference was adequate and useful. The speakers are equipped with vast field experiences and are able to deliver knowledge to the audience.

Kewell Lim
QA/QC Manager, Wilhelm SEA Pte Ltd

The masterclasses provided an excellent opportunity to reappraise our approach to risk management with input from industry experts. It was well worth attending.

Alastair Maclean
Engineering Director, Rubicon Offshore International

More opportunities specially tailored for learning & networking

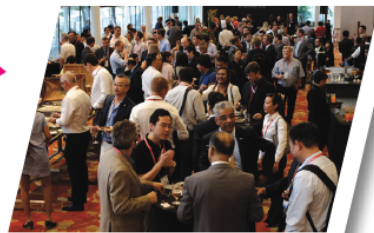

New at OSEA

SUBSEA Asia Conference drew a full house and satisfied strong demand for industry insights.

OGmTech2016 showcased advanced metrology solutions available for the oil & gas industry.

Trade professionals mingled for business and pleasure at the **Industry Networking Night**.

New at OSEA

Industry experts shared useful know-how and updates at the **OSEA Tech Garage**.
