

## U.S. Department of Commerce Grants

# Trade Fair Certification

### OSEA 2018: November 27-29, 2018 in Singapore

The Association of Southeast Asian Nations (ASEAN) is witnessing a surge in demand for energy especially for natural gas including LNG. According to the International Energy Agency (IEA), energy demand within ASEAN is expected to increase by another 80% by 2035. This means opportunities for U.S. exporters over the next 15-20 years where Singapore can serve as the gateway to the region for services and equipment. In addition, with the rebound and stabilizing of oil prices, the oil and gas industry in Southeast Asia is now looking to new investments and offshore projects which had seen a reduction as well as restructuring over the past three years.

First launched in 1976, OSEA has since grown to be the most established oil and gas industry event in Southeast Asia with close to 1000 exhibitors from almost 50 countries/regions. OSEA 2018 is being held alongside:

- OGMTech2018 – showcasing manufacturing technologies for raising productivity in the oil and gas industry
- SUBSEA Asia – featuring the latest subsea equipment and services

#### Singapore's Oil & Gas Industry at a Glance

- Home to 3 LNG regasification tanks with a capacity of 6 million tons, the Singapore LNG Terminal is being expanded to 11 million tons to advance the nation as a regional LNG bunkering and LNG trading hub.
- One of the most important shipping centers in Asia and among the world's top 5 oil refining and trading centers.
- Experience and expertise in producing jack-up rigs and in conversions of Floating Production Storage Offloading units.
