

U.S. Commercial Service – Brazil

Warm greetings to U.S. suppliers of oil and gas equipment and services.

The U.S. Commercial Service is very pleased to work together with IMEX Management, Inc. to promote the U.S. Pavilion at Rio Oil & Gas Expo and Conference 2018. This conference provides excellent opportunity for U.S. companies to explore business opportunities with Brazilian buyers, sales representatives, and potential strategic partners.

With important oil discoveries and one of the largest medium-term oil exploration and development budgets in the world, the Brazilian oil and gas sector offers many business opportunities. Those opportunities coupled with Brazil's solid democratic institutions, economic recovery prospects, and long-standing friendly relations with the U.S., makes Brazil an ideal partner for U.S. companies seeking long-term and mutually beneficial business relationships.

The U.S. Mission to Brazil unites the forces of several U.S. export promotion agencies, and stands ready to help you to fully engage in this growing and dynamic market. Don't miss the opportunity to exhibit in the U.S. Pavilion of the largest oil and gas show in Latin America!

Mark Russell
